

Medical Guidelines for Triage:

P1 (Immediate): Life-threatening conditions. Examples: Cardiac arrest, severe trauma, acute respiratory distress.

P2 (Urgent): Potentially life-threatening conditions. Examples: Chest pain, severe bleeding, altered mental status.

P3 (Delayed): Serious conditions requiring attention within hours. Examples: Fractures, moderate abdominal pain, high fever.

P4 (Minor): Non-urgent conditions. Examples: Minor cuts, common cold symptoms, chronic pain exacerbation.

Escalation criteria: Worsening symptoms, failure to respond to initial treatment, new severe symptoms.

Human Review Flag: Required for P1 cases, complex P2 cases, or when confidence score is below 70%.
